Typography: Myriad Pro

This typeface can be used in large formats as a compositional element, a point of contrast or emphasis and as a headline typeface.

Myriad Pro can be utilized as the primary typeface in all applications. This typeface is appropriate for headlines, paragraphs of copy and information design.

Consistent use of weights is necessary across programs:

Myriad Pro
Regular (Body)
Bold
Semibold

System Typeface

Not everyone will have access to a license for the primary typefaces. Because of this, alternative system typefaces are recommended for consistency across various applications including Word and Powerpoint.

Microsoft Office & Outlook
Arial is a typeface available in Microsoft Office and Outlook that shares similar characteristics with Bernina Sans and should be consistently applied when available.

Consistent use of weights is necessary across programs:

Bold for headlines
Regular for body copy
Italic for emphasis and additional hierarchical needs
• Standard round bullets should be used for lists

Arial

- Regular
- **Bold**
- *Italic*
- ***Bold Italic***
