# Key Materials for Signs, Tags & Labels

## SIGNS

**Adhesive Vinyl** – Ideal for indoor and sheltered outdoor marking needs. Flexible vinyl with a printed matte surface. Permanent adhesive back with peel-off liner.

**Plastic** – Impact-resistant and pliable, plastic is durable for indoor and sheltered outdoor use. Print is protected by Sign Muscle® to guard against harsh abuse and even graffiti. Rounded corners with mounting holes.

**Aluminum** – Ideal for tough indoor and harsh outdoor locations. Rigid aluminum provides metal strength without rust. Print is protected by Sign Muscle® to guard against harsh abuse and even graffiti. Withstands wash-downs, abrasion, and chemical splashes—rounded corners with mounting holes.

**Reflective Aluminum** – Engineer-grade prismatic (EGP), reflective, .080" thick aluminum provides added visibility in low light conditions. Print is protected by Sign Muscle® to guard against harsh abuse and even graffiti. Rounded corners with center post-mount holes. Durable for outdoor locations.

**Lumi-Glow™ Plastic & Lumi Glow Flex** – A long-lasting, glow-in-the dark, semi-rigid sign material that charges rapidly under any light source. It exceeds the safety standards, features, and benefits of safety grade photo-luminescent markings. The Flex material option is a 10-mil photo-luminescent vinyl with a permanent acrylic adhesive-coated back with peel-off liner.

## LABELS

**Adhesive Vinyl** – Flexible vinyl with a printed matte surface. Mount with permanent acrylic adhesive back with peel-off liner—ideal for indoor and protected outdoor placement.

**Magnetic Vinyl** – Flexible magnetic vinyl can place, lift, and replace on most steel or ferrous metal. The print has a clear overlaminate to resist chipping and cracking.

## TAGS

**PF-Cardstock** – Pulp-free tags have no wood pulp or paper content, unlike standard cardstock tags, and are available at an economical price. Poly-based tags will not crack, distort, or shrink and can be used for applications indoor and short-term outdoor. Available in self-laminating.

**RP-Plastic w/ Grommet (Unrippable Vinyl)** – High-strength rigid plastic tag is ideal for use in industrial environments – resists chemicals, tears, and abrasions. The surface is easy to write on with a pen or marker, resist scuffs, and can be used indoors or temporarily outdoors.

## PARKING & ROADWAYS

The first test of a properly identified campus starts at the front entrance, carries to parking lots, and all roadways in-between.

## BUILDINGS & GROUNDS

Clear identification continues around campus grounds, into and throughout all buildings.

SAFELY MADE IN THE USA®

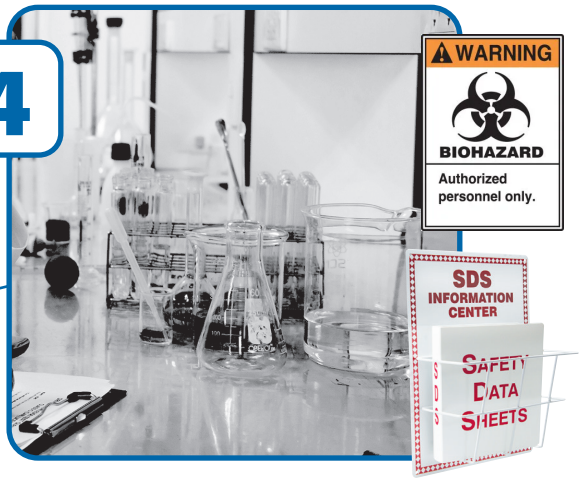
For more safety identification solutions, contact your distributor or visit AccuformNMC.com

3

## BUILDING ENTRANCES

Identify entrance procedures, directions and prohibitions with clear signs and labels.

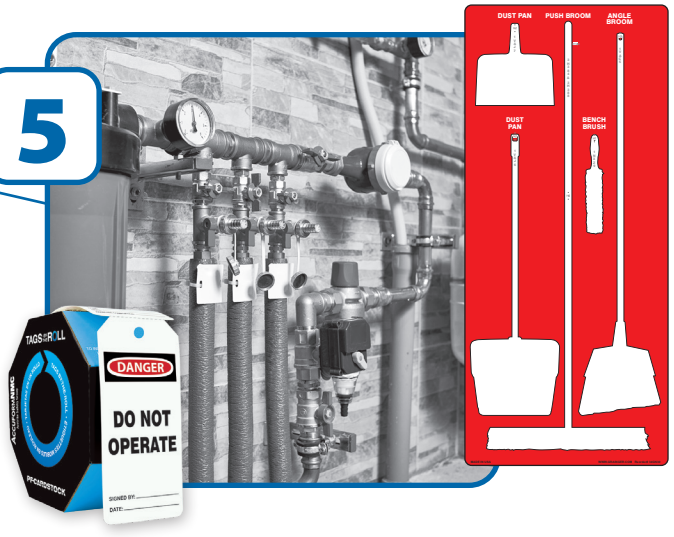
4



## CLASSROOMS, LECTURE HALLS & LABORATORIES

Classroom markings, laboratory PPE requirements, and labeling go a long way towards a safe environment. Look to reinforce safety with PPE dispensers, secondary container labeling and much more.

5



## MAINTENANCE, WAREHOUSING & FACILITIES

Keep your workers and contractors informed about safety requirements as soon as they enter these areas. Use identification, 5S lean practices, and more to drive a safe and productive environment.

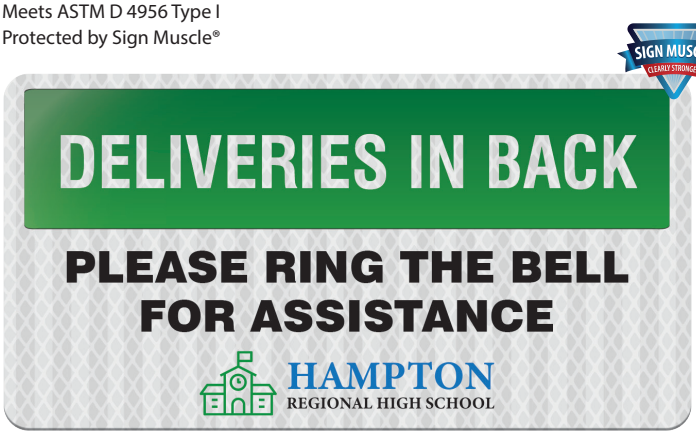
# Custom Traffic & Reflective Signs

All traffic signs are made of durable .080" thick aluminum that will not rust. Signs are printed with UV-resistant inks that prevent fading during long-term outdoor environmental exposure. All signs come pre-drilled with post mount holes.

## Engineer-Grade Prismatic (EGP)

- Micro-prismatic retroreflective sheeting provides added visibility in low-light and night time conditions
- Recommended for commercial sign application and non-critical traffic control signs regulated by the MUTCD
- Guaranteed up to 5 years
- Meets ASTM D 4956 Type I
- Protected by Sign Muscle®



## High-Intensity Prismatic (HIP)

- Complies with MUTCD regulation for traffic signs on all roads open to public traffic
- Over three times brighter than standard Engineer-Grade Prismatic sheeting
- Guaranteed up to 7 years
- Meets ASTM D 4956, Type III, Type IV and Type x
- Protected by Sign Muscle®

# Pipe Markers

Pipe markers are to visibly identify contents, flow direction and hazard classification.

Compliance Counts:
**ASME A13.1 Compliant - Identifying Piping Systems**

ASME A13.1 Scheme for the Identification of Piping Systems "…a uniform system for the identification of piping contents has been established to warn personnel when the piping contents are inherently hazardous… this standard has been prepared to specify the identification of the contents of piping systems on the basis of legends, it also suggests the use of color as a supplementary means of identifying the type of hazard of the material contained in the system."

# Lockout Hasps

These devices provide the ideal solution when procedures require multiple workers on locked-out equipment.

Workers can be assigned a padlock (sold separately) with shackle diameter up to 9/32" to attach to the hasp before starting their task. Ensure the energy source stays locked out — with multiple workers' padlocks in the holes of the closed hasp. Once each worker completes their task, they remove their padlock. The hasp cannot be removed until the last padlock is removed.

## STOPOUT® Aluma-Tag™ Hasps

- Scissor-style hasp comprised of two high-strength .090" thick red anodized aluminum plates
- Accommodates up to six padlocks (sold separately)
- Crossover jaw ends prevent prying and tampering
- Get true 1 1/2" round reach with the full jaw opening
- Measures 7" H x 2 3/4" W
- Bold, contrasting red/white/black lockout hazard message labels on both sides — with space to write in necessary information
- Red octagon shape reinforces lockout status and conveys STOP

At AccuformNMC, we combined the best-of-the-best in sign protection to increase the longevity of signs, labels, and more with our superiorly protective Sign Muscle®.

# SIGN MUSCLE®

## Sign Muscle® preserves the life of your signs and labels!

The Sign Muscle® formulation is powerful enough to survive in most environments...and it's patented.

Pioneered more than a decade ago, our scientifically strong liquid laminate protects your identification product from virtually any hazard. Durable, strong and resilient, Sign Muscle® delivers protection – guaranteed.

A sign that lasts starts with a quality base material. For example, an industry-tested material like plastic versus a typical competitor material with unknown origins. The wrong base material can speed up damage to the potential life-saving safety message that sits on top. A message that guides a workforce to safety is a message that we can't allow to fade.

Longevity through quality also means scientifically engineered ink-sets specifically created for the materials they will be printed on.

***That's the difference, driven by facts and supported by science. Resist fading and easily restore like new!***
